

Brackley Transport Study –

The idea of this study which is being trialed in the Brackley area is to engage with local community to understand current provision and travel needs in Brackley and surrounding villages. The study is being led by Robin Pointing of Go Travel Solutions. He explained he had been a bus operator and therefore had invited chairmen of local councils and representatives from Brackley for their comments. He explained some additional funding may be available as HS2 not going North. All villages including myself explained we had no buses but if we could get to Brackley more options are available. Everyone explained about medical appointments, getting to Banbury and Northampton Colleges for young people. We all agree Ability Bus was available but I explained two villagers booked to go to Tesco Brackley but were there for 3 hours I said not one supermarket in Brackley has a coffee shop where you can sit and wait. There will be an online survey which we hope villagers will complete and Mr Pointin will be at coffee shop tomorrow to listen to villagers comments.
